Article: Rothschilds, And The Geoengineering Empire

Rothschild owned defense contractor Raytheon does all “forecast” modeling for the National Weather Service and NOAA. Lockheed Martin does the modeling for the FAA. Since both of these private defense contractors are up to their necks in weather modification patents and programs, the “forecasts” are more or less the “scheduled” weather.

Steps to Physical Detoxification and Cellular Regeneration

1. Test to Evaluate Health Status:

- **Test for deficiencies** - QXCI SCIO or Indigo (Find a SCIO or Indigo practitioner at www.services.freshandalive.com, www.judyharms.com, Gage Tarrant at www.mindnrg.org), or hair analysis (www.arltma.com), fecal analysis, medical tests as needed, etc.
- **Test for heavy metals and other toxins** - hair analysis, fecal analysis, QXCI SCIO, medical tests as needed, etc.
- **Test for chemtrail toxins and GMO microbes**- usually will not be identified with medical tests, QXCI SCIO/Indigo and other tests that detect biowarfare agents can detect them.
- **Test for radioactivity in body**- QXCI SCIO or Indigo (Find a SCIO or Indigo practitioner at www.services.freshandalive.com, www.judyharms.com, Gage Tarrant at www.mindnrg.org). Medical testing determines exposure based on observed symptoms rather than direct measurement. Lawrence Berkeley National Laboratory has developed a simple blood test to determine the exposure of a patient to ionizing radiation, that can be carried out in the field with a hand-held analyzer, but as of early 2016 it is not on the market.

2. Internal Cleansing

Radiation Detox Protocol

Symptoms

Do not attempt to self-diagnose, always get professional help and diagnosis to determine what is going on. Typically, with low to moderate exposure ingested in food or water, indigestion occurs quickly, within an hour or so, followed by burning in the intestines, abdominal pain and bloating, possibly vomiting, possibly aching kidneys, aching and hardened liver, fatigue or exhaustion, weakness, bags under the eyes indicating kidney stress, and more.

Since low level accumulation through food, water, and air may not have acute symptoms, **it's important to be on a preventive detox and nutrient regimen every day** to avoid accumulation of radiation and to strengthen the body and immune system. A weak thyroid and thinning hair can be a symptom of thyroid issues from low level radiation exposure.

Prevention

Detoxing on a daily basis and eating a healthy diet high in living foods (at least 80%) are a key to keep-

ing your body and immune system strong. Unless you're growing your own nutrient-dense food, you'll likely need to supplement to get the nutrients that your food is lacking, particularly vitamins, minerals, probiotics, and enzymes. Hair analysis, fecal analysis, and QXCI SCIO or Indigo scans can tell you what you're deficient in and what toxins need removal. Typically, the medical establishment advises to use potassium iodide to prevent the thyroid gland from absorbing radioactive iodine-131. This is the poorest form of iodine, monatomic iodine such as Dr. Cousens' Illumodine or any brand of nascent iodine are far better. Illumodine has been bombarded with scalar energy frequencies that allow it to radiate scalar wave anti-frequencies of all known radioactive elements, making it much more effective.

Detoxification/Healing Protocols

Understand this is a very brief synopsis and should not be construed as medical advice. Always seek professional help from a licensed practitioner, ideally before you get sick so you'll be prepared and know what to do. You should have a radiation detox kit on hand so you will be able to detoxify yourself immediately, which can radically reduce your suffering and symptoms, and greatly accelerate recovery.

Although they are not FDA-approved diagnostic or healing devices, in truth the QXCI SCIO or Indigo quantum biofeedback devices can detect alpha, beta, and gamma radiation damage and send scalar energy into the body to accelerate healing. Check online or at <http://services.freshandalive.com> to find a SCIO or Indigo practitioner in your area before you need one!

The medical establishment uses drugs such as DTPA, EDTA chelation, and penicillamine given intravenously to remove certain radioactive elements after they have been absorbed. Although this absorbed radiation contaminant often will not cause "acute radiation sickness," it can lead to chronic disorders (such as leukemia or other cancer) over time unless it's removed.

Detox First Aid Kit

It's important to be prepared in advance with a first aid kit to detoxify the body as quickly as possible after contamination. Ken Rohla keeps these on hand at all times, at home, work, and when traveling, taken as directed:

- Rad D-Tox (for radioactive particles and radiation damage, www.freshandalive.com)
- Coseva Advanced TRS nano zeolites and Results RNA ACZ Nano zeolites (www.freshandalive.com)
- Dr. Schulze's Intestinal Formula #2 (www.herbdoc.com) or a mixture of food-grade charcoal, apple pectin, and bentonite clay or Sacred Clay. Take big doses to provide bulk to absorb and push contaminants out of GI tract quickly.
- LivOn Labs Lypo-Spheric Vitamin C
- Modfilan Brown Seaweed Extract (sodium alginate, prevents absorption of radioactive strontium 90, barium, plutonium and cadmium. Source: McGill University)
- Illumodine (monatomic scalar energy enhanced iodine. Note: Ken takes 20 to 30 drops per day. Recommended dosages on the packaging are very low to avoid detox reactions. Start with the recommended doses and increase gradually.)
- Dr. Morse's Cellular Botanicals No Glo Radiation Formula
- E3 Live blue-green algae (frozen at home, powder when traveling)
